Autumn/Winter 2020

# Feel at home

Russell Hobbs is at the heart of the home. But home isn't just a place. It's a feeling. It's every comforting moment that makes you feel completely at ease, utterly content, totally at home, even when you're not. Our products and the moments they make, give people the power to create and share that warm feeling of home wherever they are. The cosy cuppa that brings a homely feeling rushing back to a motorway worker's heart and fingertips when he gets back home. The homemade cookie that means today's packed lunch transports the little boy from school's dining hall to the kitchen back home. Russell Hobbs helps people create moments that make everyone feel at home.

# At the heart of your home

In 1952, two men, Bill Russell and Peter Hobbs, joined forces combining their impeccable knowledge and experience of the electrical appliance industry.

In that year, in the heart of England, Russell collaborated with Hobbs bringing together his creative flair with Hobbs' spectacular sales skills, to launch a company that to this day still embodies innovation, leadership, and sheer desirability in a competitive market.

For millions of people, Russell Hobbs has always been at the heart of your home wherever that may be. That's why we continue to put people at the heart of what we do. Through the good days and the bad, your daily tasks and the little moments of relaxation - we're by your side through it all.

We provide the kettle for your coffee and a catch up with friends, the iron that leaves you with a feeling of pride as you walk out of the house in a neatly ironed shirt, the mixer that lets you bond over baking with your little ones and the blender that helps you prepare that special soup that comforts you on even the toughest of days.

We've been there for you from the start and we'll continue to be here for you where we've always been: at the heart of your home.

# Introduction

I am really excited to make the introduction to our Russell Hobbs Autumn Winter 2020 range catalogue because it highlights some amazing innovations with our new product line up. Building on the success of recent years it is a very positive situation to be growing sales and market share across our region and the enthusiastic response we get to our products gives us great encouragement that our development programme is really being well received in the market. We continue to invest even greater levels of resource into research to understand what consumers really want from the Garment Care and Home Appliance products they are looking for and then we take the research findings to create innovative products that really deliver against the needs highlighted by consumers. To support this approach, I would like to give a special mention to the following introductions:

**Quiet Super Steam Generator Pro:** Tackle everything ironing throws at you like a pro, the Quiet Super Steam Generator Pro has got it all. Eradicate wrinkles in one pass with the 8 bar pressure feature making your ironing experience quicker and without the need for switching heat between denim, delicate or anything else and keep the iron clean with a rinse of its reusable filter.

**Express Mini Oven:** Every craving satisfied fast when you quickly cook the food that makes everyone feel at home with our Express Mini Oven, which has a huge capacity and heats up four times faster than a conventional oven. Its grill, bake, toast and warming modes will make pasta bakes, large pizzas, breakfast pastries and all kinds of tasty dishes fast.

**Air Fry Express Mini Oven:** Every craving satisfied fast when you quickly cook the food that makes everyone feel at home with our Express Air Fry Mini Oven, which has huge capacity and heats up four times faster than a conventional oven. Its air fry, grill, bake, toast and warming modes will make crispy chips, large pizzas, breakfast pastries and all kinds of tasty dishes fast.

We continue to work as a global organisation to bring the best possible products to the market that offer great performance and quality that means we can continue to grow the business successfully. This is achieved through great teamwork and cooperation between our colleagues all over the world and also incorporates the feedback we get from all forms of communication we receive as this proves to be so valuable. On this point I would be delighted to hear from you with any comments you may have regarding our Home Appliance business as this continues to be of significant importance to our ongoing development.

I hope you enjoy the new range and thank you for the ongoing support.

Tim Wright  
Vice President Appliances Europe MEA

# IMPACT IRON

## 2400W

### Make a dent in your ironing, not your iron

The Impact Iron designed for the drop! Its resilient rubber armour means that the inevitable fall, will not be fatal. The Dura-Coat layer absorbs the shock and repels it, keeping your beloved iron safe. But if strength isn't enough to make you swoon, its precision steam tip also helps to make your life easier, working its way into those awkward corners!

# SUPREME STEAM

## CORDLESS 2400W

### The smart way for hassle-free ironing

The most innovative iron, designed with function as well as form at its heart, with no cords for easy ironing. Sitting in its own smart light ring which acts as a safe and secure base and lights up to let you know about the iron's status in use.

### Impact Iron

- Engineered for durability
- Survives a max. 1.2m drop
